Presentazione: As software engeener my responsibilities include gathering user requirements, defining system functionality and writing code. I have a major experience in frontend technologies, like Javascript, HTML5 and CSS3, including related frameworks like Angular. I often develop rest services using languages like Javascript (NodeJS + Express), PHP, or Java (Spring Boot). I sometimes deal with UI design and UX requirements, like developing wireframes and prototypes (Adobe XD). My goal is to build high-quality, innovative and fully performing software that complies with coding standards and technical design.
